

As well as promoting  
general **well-being**,  
mindfulness offers us the  
opportunity to use the  
capacity of our mind to  
face **stress, pain or illness**.

## Mindfulness-Based Cognitive Therapy

MBCT is a structured eight-week group course which teaches a combination of Mindfulness Meditation and Cognitive Behavioral Therapy, with a proven record of preventing the relapse of depression. It is supported by a growing base of empirical research and **recommended by the National Institute for Clinical Excellence as a treatment of choice for recurrent depression** (NICE Clinical Guidelines 90, page 57).
